

ASSOCIATE IN BIOLOGY (DTA/MRP)

Courses by Quarter

In planning this degree students need to work closely with their advisor and the transfer institution so that the science credits within the degree create a seamless passage to the transfer institution. Although the Associate Degree transfers to four-year colleges and universities in Washington State, it may not meet specific department requirements. To earn an Associate in Biology degree all courses taken must be:

- At college level (numbered 100 or above).
- A minimum of 75 of the 90 credits required for the degree must be from the General Education Requirements for the Associate in Arts & Science – Direct Transfer Agreement. Copies of the list are available on line at spscc.edu/programs/general-ed-requirements.
- A class can only count once toward General Education requirements. For example, IIS 125 will satisfy either HUMANITIES or SOCIAL SCIENCE course requirements, but not both.
- A maximum of 5 credits in performance/skills courses may be applied to the humanities distribution requirement.
- A cumulative grade point average of 2.0 or above in all college-level courses required.
- Although this degree is a general transfer degree, South Puget Sound Community College has provided pathways and associated recommended courses for ease of student selection based upon a student's career interest. Please review the pathway maps for recommended courses and course sequences.
